

# BioBubble™

Innovative Product Solutions

## PRODUCT DESIGN & MANUFACTURING

Companies and inventors rely on BioBubble to turn their dreams into actual working products. Using our creative design process, we work with our customers to take a project from a concept, through brainstorming, prototyping, engineering, and production. Our goal is to become your OEM partner for your product development and delivery, demanding little to no supervisory time but delivering high-quality results. BioBubble currently holds domestic and international patents for design and utility. Our innovative product development process consistently produces award-winning products across all categories.

## Let BioBubble Be Your Competitive Advantage

BioBubble is an internationally recognized award-winning product design and manufacturing organization. With offices, warehousing and manufacturing facilities in North America and Asia, BioBubble is positioned to meet the needs of distributors and retailers worldwide.

Beginning with the initial product design and development process, all the way through tooling, production, quality inspection, packaging and logistics, BioBubble provides innovation, value and a competitive advantage to our partners.

BioBubble is routinely awarded United States and international patents for utility and design. Our innovative product development process consistently produces award-winning products across multiple categories.

As an Intertek certified manufacturer, BioBubble meets the highest standards for organizations operating manufacturing facilities overseas.

This ensures we provide service that meets the highest standards for security, quality and social compliance. See why BioBubble is considered a valuable resource partner for product design, intellectual property development and contract manufacturing services.
